

SCRIMS AND FLAGS

Made of steel spring tube combined with unique fabrics, Scrims and Flags are light and strong and cut or soften light with great effects. To achieve the ideal positioning performance of Scrims and Flags, Manfrotto provides a complete Grip Head system. All textiles are also sold separately as spares in case your originals become damaged.

HIGH QUALITY

Every item is made with care for all details from cutting to sewing of the material to the frame.

A special design of the frame allows perfect 90° corners without losing elasticity of the frame.

SPARE PARTS

The unique design of our scrims and flags allows them to be repaired easily.

A velcro locking system fixes the cover to the frame while a built in pin maintains the perfect tension in the steel wire. To order spare part covers for scrims and flags add the letter "R" in front of the order code. I.e. RI650K is the spare part cover for the item I650K SILK SCRIM.

LABELLING

A label sewed close the handle will tell you the dimension of the frame in inches and centimetres.

SCRIMS AND COLOUR CODES

All our scrims are made using high temperature resistance Webbing. We used a colour code system to easily identify the different kind of textile; see table.

Silk (artificial)	Yellow
Silk 1/4 Stop	Blue
China Silk	Purple

Black Single (scrims)	Green
Black Double (scrims)	Red
Black Triple (scrims)	Black

White Single (scrims)	White
White Double (scrims)	Grey
White Triple (scrims)	Brown

Floppies and Cutters FRAMES. If you wish to order the frame alone without fabric please refer to this chart.

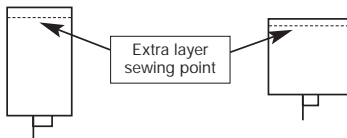

Made of Black Commando fabrics, Cutters and Floppies stop light completely and are used to control or cut illumination sources, whether natural or artificial. They can also be used to protect camera lenses from flare.

To order spare part covers for floppies and cutters add the letter "R" in front of the order code. I.e. R11021, is the spare part cover for the item I1021 CUTTER 18 x 48.

All our flags, floppies and cutters are made using a strong webbing all around the frame, to protect the edges from wear.

Floppies are Cutters made with an additional piece of fabric, which is fixed with Velcro and can be unfolded, becoming twice its original size. See drawing to understand where the extra layer is sewed on the frame.

40MM (1.6") TELESCOPIC POLYHOLDER D750

Max Size Holding: 156cm.
Folded Length: 91cm.

Polystyrene is one of the most widely used light bouncers, but it's not the easiest material to handle. Now our Poly-Holder gives you total control. It grips any thickness, is telescopic to hold most full sheet sizes; then just fixes into the lighting Grip Head (code D200) mounted on a stand or clamp. What could be easier?

AVENGER

MOUNTING STIRRUP FOR 40" REFLECTOR BOARD I8030CB

Will fit reflector board from 5mm to 25mm thickness.
Board not supplied.

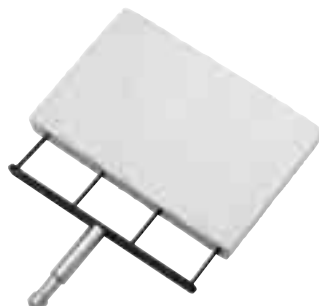

AVENGER

FOAMCORE FORK 16MM PIN F1504

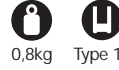

Similar to the F1501, but includes four pointed pins to mount thicker foam core or gator-board. Mounts via a 16mm pin.

AVENGER

30MM (1,2") POLYHOLDER F1501

A foamcore support clamp to enable precise positioning. Mounts via a 16mm socket.

AVENGER

50MM (2") POLYHOLDER WITH SWIVEL JOINT 28MM SPIGOT F1520

The Polyholder has a 28 mm spigot with a ball-and-socket joint to allow rotation and flexible positioning. The board "clamp" has two sides, one white for the reflective side of the polystyrene; one black for the light-stopping side. It doesn't damage the poly. Two metal spikes (on wire retainers) keep the polystyrene board firmly in place. The structure is robustly built to hold thick polystyrene boards, and also has a secondary safety hook to anchor the polyholder to the lightstand/clamp/etc. Plate dimensions: 150 x 220mm. Mounts via a 28 mm pin.

AVENGER

50MM (2") POLYHOLDER WITH 16MM SPIGOT F1521

The polyholder has a 16mm spigot. The "board" clamp has two sides, one white for the reflective side of the polystyrene; one black for the black light-stopping side. It doesn't damage the poly. Plate dimensions: 150 x 220mm
