

Electric welded aluminum tubing for higher mechanical performance and reduced weight.

Parts made by die cast aluminum to ensure longer lasting mechanical performance and extension linearity of column.

Clever room-saving concept for folding stands flat when not in use or during transportation (you can pack 7 Stacker stands in the space of 4 normal stands).

Double braced legs for extra stability, resistance and safety.

3/8" screw top fixing, plus 1/4" adapter for matching any requirement.

Excellent protection against corrosion and wear is ensured by aluminum anodization.

Clip system for moving 2, 3 or 4 stands together during loading/unloading.

Supplied with threaded hole for optional strap.
